

## EASY Pumpkins

You will need: 1 Fat Quarter,  
1 Fat Eighth (or small remnant) and  
a regular roll of toilet paper.  
(An extra large roll of tp may be too large for a fat  
quarter)

Center the roll on the opened Fat Quarter

Wrap the short edges into the hole

Then, wrap the longer ends into the hole. These will hold the smaller sides in place. (Hint: wrap evenly and tightly for tidier pumpkin)

To finish, stuff your remnant or a Fat Eighth into the hole for the stem.

This is a simple way to decorate for autumn AND is a unique way to store your tp. Come to QNG to see our variety of pumpkins! Send us your pictures and ideas for using these! We would love to see them!
